Subject: Structural Equivalency & Permissive Use of AE or MSC Mounting Hardware

Sir/Madam:

My generic solar domestic hot water installation plan <http://www.cadvice.us/sw/AS.1.3.WH.pdf> may be used interchangeably with both AE & MSC mounting hardware

AE hardware is shown in the foreground, MSC in the background. Each shall be used with its' respective solar collectors, e.g. AE hardware with AE solar collectors and MSC hardware with MSC collectors. My plan sheet is too crowded to include both. AE is shown because it is the volume leader. Those who wish may visit the manufacturer's website for additional information <http://www.aetsolar.com/>.

I am available per the letterhead for those having questions.

Sincerely,

Allen Gezelman
